

Cover letter

Dear Sir or Madam

I am a master's student at the Otto-von-Guericke University in Magdeburg. My study program is almost completed, and I would like to join a team of developers.

I have good knowledge of java enterprise tools. The list is quite long, and it is provided in the CV.

Regarding software my goal is to write maintainable code with clear design structure. I support the idea of CI/CD and know some part of DevOps stack as well.

It is probably better to keep this letter short

Have a nice day

Kind regards, Konstantin Pinegin
